Description

Conference Line: 866-299-9141

Participant code: 634-653-72

Currently, NORTH DAKOTA STATE UNIVERSITY (North Dakota SARE /Dickinson Research Extension Center) is currently involved in a process to request funds for an energy impacts initiative via their state government at the request of our local farmers and ranchers.

Per email request, some discussion topics included:

- what the various above and below ground impacts may be
- how we could take part in monitoring those impacts
- what does it take to carry out such an effort?
- what specific parameters need to be monitored and what methods are normally used?
- are there opportunities for Region 8 EPA collaboration or funding? We are currently involved in a process to request funds for an energy impacts initiative via our state government at the request of our local farmers and ranchers.

Personal Notes
